

The background of the slide features a light gray surface with several thin, curved lines in brown, pink, yellow, red, blue, and green. On the right side, several wooden pencils are visible, some of which have just finished drawing the colored lines. A black rectangular box is positioned on the right side of the slide, containing the title and author information.

Multiple Choice Quiz

By Nick Fletcher

What my program does

- ◆ With my program I wanted it to be a quiz about history and have a user be able to read the answers and be able to select an answer.
- ◆ My code will ask the user if they want to play the quiz or not
- ◆ Then it will print the first question and possible answers, the user will then choose which answer they wish to choose
- ◆ After they answer the question, the program will loop through each of the questions until the user has answered all questions.
- ◆ At the end the user will be asked if they want to go again, if not then the program will exit.

Process

During the process of creating this quiz I ran into a lot of issues and bugs (mostly syntax errors, English is hard)

When I ran into an issue I would try to fix it myself first, if I couldn't fix it I would then go to my teachers for help in understanding what I did wrong or my fellow classmates (mostly Nic)

When I was done I went back over my app to go through it and understand all of the fixes I had made and make sure that my program ran how I wanted it to.
